

STREET SURVIVAL FOR SMALL FRAMED OFFICERS

This 16 hour (2 day) course is designed from the ground up for the smaller framed male and female officer. It is intended to teach those officers defenses against common street weapons and attacks, both standing and on the ground. This course will also instruct officers in advanced Defensive Tactics techniques, Firearms Tactics, Weapon Retention, as well as updated techniques for Building and Room entry and clearing. Instruction on vehicle stops and common ambush attacks will be addressed as well.

With the majority of departments today implementing single person police patrol vehicles, it is more important than ever that the smaller framed male and female officers have the skill sets they need to overcome any threat they may face. This course will give those officers the confidence and skill they will need to not only overcome those threats, but win any challenges they may face on the street. This course is a must for any department employing smaller framed male and female officers in their ranks. This course will give them the winning edge they will need to face whatever scenario they confront during their shift.
